

DIAL

STAND

CREATE IT

1.) Print out this PDF on high quality paper.

Do it right once and you'll never have to do it again.

You will be dealing with sharp implements so procede with caution!

2.) Gather together:

Scissors,

X-acto Knife,

Cutting Board,

Glue Stick,

Packing Tape,

Clean Pizza Box Cardboard,

1 Push Pin,

2 Thumbtacks,

2 Mechanical Pencil Erasers.

3.) Carefully cut away the excess paper surrounding the three parts of the wheel.

Try to stay inside the black circle surrounding the Dial without cutting into the colored areas.

4.) Use glue stick to affix the cutouts to clean pieces of pizza box cardboard.

Carefully cover with packing tape to laminate the Dial and Base (but not the Stand).

Trim away excess pizza cardboard.

5.) Use pushpin to poke holes in the black/white dots of the Dial and Base.

Push a thumbtack up through the bottom of the Base, through a poked hole.

Tape over the bottom of the thumbtack to hold it in place.

6.) Cut along the dotted line of the Stand, removing the square space at its center.

Cover with glue stick and affix to the bottom of the Base.

7.) Poke a thumbtack up through the black/white dot on the edge of the Dial.

Place an eraser on the thumbtack point to protect its tip.

8.) Mount the Dial on top of the Base with the thumbtack at its center like a spoke.

Put an eraser on its point to hold it in place.

9.) Spin it around a bit and go play some Free Frontiers!
